

# Reel Breakdown - Andrzej Kozlowski MSc

## General Showreel 2008/09 (length: 40 seconds)

### Delta Strike Intro (first seen at 00:00 sec.)

---

This is the introduction animation for the Delta Strike game. My tasks in this project were:

- concept art
- shading
- rendering
- editing
- modeling
- lighting
- compositing
- texturing
- animating
- sound

All 3D-related tasks were realized in **Maya 8.5**. Texture painting was done in **Photoshop CS2**, compositing in **After Effects CS2** and **Shake 2.5**. Music was composed by Michael Plank.

### Animated Concept Art (first seen at 00:02 sec.)

---

This is an **environment concept art** I painted just for **fun** in **Photoshop CS3**. In order to convey the **depth** of the scene I created an animated **camera projection** in **Maya 2008** and added some glows and lens flares in **After Effects CS3**.

### Apocalypsis Ex Machina (first seen at 00:06 sec.)

---

This **Unreal Tournament III Machinima** is an interpretation of the **biblical Apocalypse of John**, created in **gothic** style. It was a **solo project** and my tasks were:

- concept art
- shading
- rendering
- editing
- modeling
- sculpting
- lighting
- texturing
- animating
- sound

The assets were created in **Maya 2008**, **ZBrush 3.1**, and **Photoshop CS3**. The machinima was shaded, lit, animated, and captured in the **Unreal Editor** of **UT3**. Several textures are based on gothic paintings. Wall textures and some particle sprites are modified UT3-assets. **Music** was composed by **Cris Velasco** for the game Clive Barker's Jericho.

This machinima was **awarded** the **Mackie** for **Best Visual Design** at the 5<sup>th</sup> International Machinima Festival in November 2008 in New York.

## **Delta Strike Gameplay (first seen at 00:10 sec.)**

---

I created all the visuals for this game as in the Delta Strike Intro and embedded them in Flash. Alexander Seifert and Michael Plank have written all the code needed for the game.

The game was **awarded** the **Media Cube** for the **Best Computer Game** at the Media Gala 2007 in Linz.
